

# 2025 NSF CSSI / CyberTraining / SC�PE PI Meeting

## Opening Remarks

Vivak Patel

University of Wisconsin – Madison

# Overview

1. Acknowledgments
2. Why is this meeting important?
3. Housekeeping

# Acknowledgments

# My own limitations

I do not have the words, wisdom nor insight to contextualize the last six months, capture its consequences for you, and what that will mean for the future.

# My own limitations

I do not have the words, wisdom nor insight to contextualize the last six months, capture its consequences for you, and what that will mean for the future.

In my **limited** experience, this planning cycle has been exceptional. And anything out of the typical brings unique challenges.

# My own limitations

I do not have the words, wisdom nor insight to contextualize the last six months, capture its consequences for you, and what that will mean for the future.

In my **limited** experience, this planning cycle has been exceptional. And anything out of the typical brings unique challenges.

Of equal importance, it has given me the opportunity to see how incredible and committed members of our community are to seeing the continued success of the American research effort.

**You**

Why is this meeting  
important?

# American Research Effort

The National Academies identified three key pillars that drive the success of the American research effort:

1. **A talented and interconnected workforce** created through education, training, supportive research environments, strong professional relationships, and sharing of ideas and resources.
2. **World-class basic research** in all areas of STEM and beyond.
3. **Adequate and dependable resources** including scientific infrastructure, and stable/predictable federal funding.

# American Research Effort

The National Academies identified three key pillars that drive the success of the American research effort:

1. **A talented and interconnected workforce** created through education, training, supportive research environments, strong professional relationships, and sharing of ideas and resources.
2. **World-class basic research** in all areas of STEM and beyond.
3. **Adequate and dependable resources** including scientific infrastructure, and stable/predictable federal funding.
4. **Service** to the profession, community and society.

# How this meeting contributes...

1. You will have opportunities to **share ideas and resources** that your work has produced (posters).
2. You will have opportunities to **build professional relationships** within and across programs (posters and receptions).
3. You will have opportunities to contribute **community perspectives** on the CSSI, CyberTraining and SCIPE programs (breakouts).

# Meeting Outcomes

The meeting will produce **a report** that provides feedback on the meeting, community perspectives on the sponsoring programs, and community perspectives on future directions.

# Meeting Outcomes

The meeting will produce **a report** that provides feedback on the meeting, community perspectives on the sponsoring programs, and community perspectives on future directions.

Last year's report

# This Report

This year's report will be particularly **important** in the face of shifting national initiatives for research.

We must clearly and compellingly communicate how foundational these programs have been in precipitating modern advancements **that gave rise** to these initiatives, and **will give rise** to the next generation of advancements.

# Meeting Outcomes

This year's report will be particularly **important** in the face of shifting national initiatives for research.

We must make clear and compellingly communicate how foundational these programs have been in precipitating modern advancements **that gave rise** to these new initiatives, and **will give rise** to the next generation of advancements.

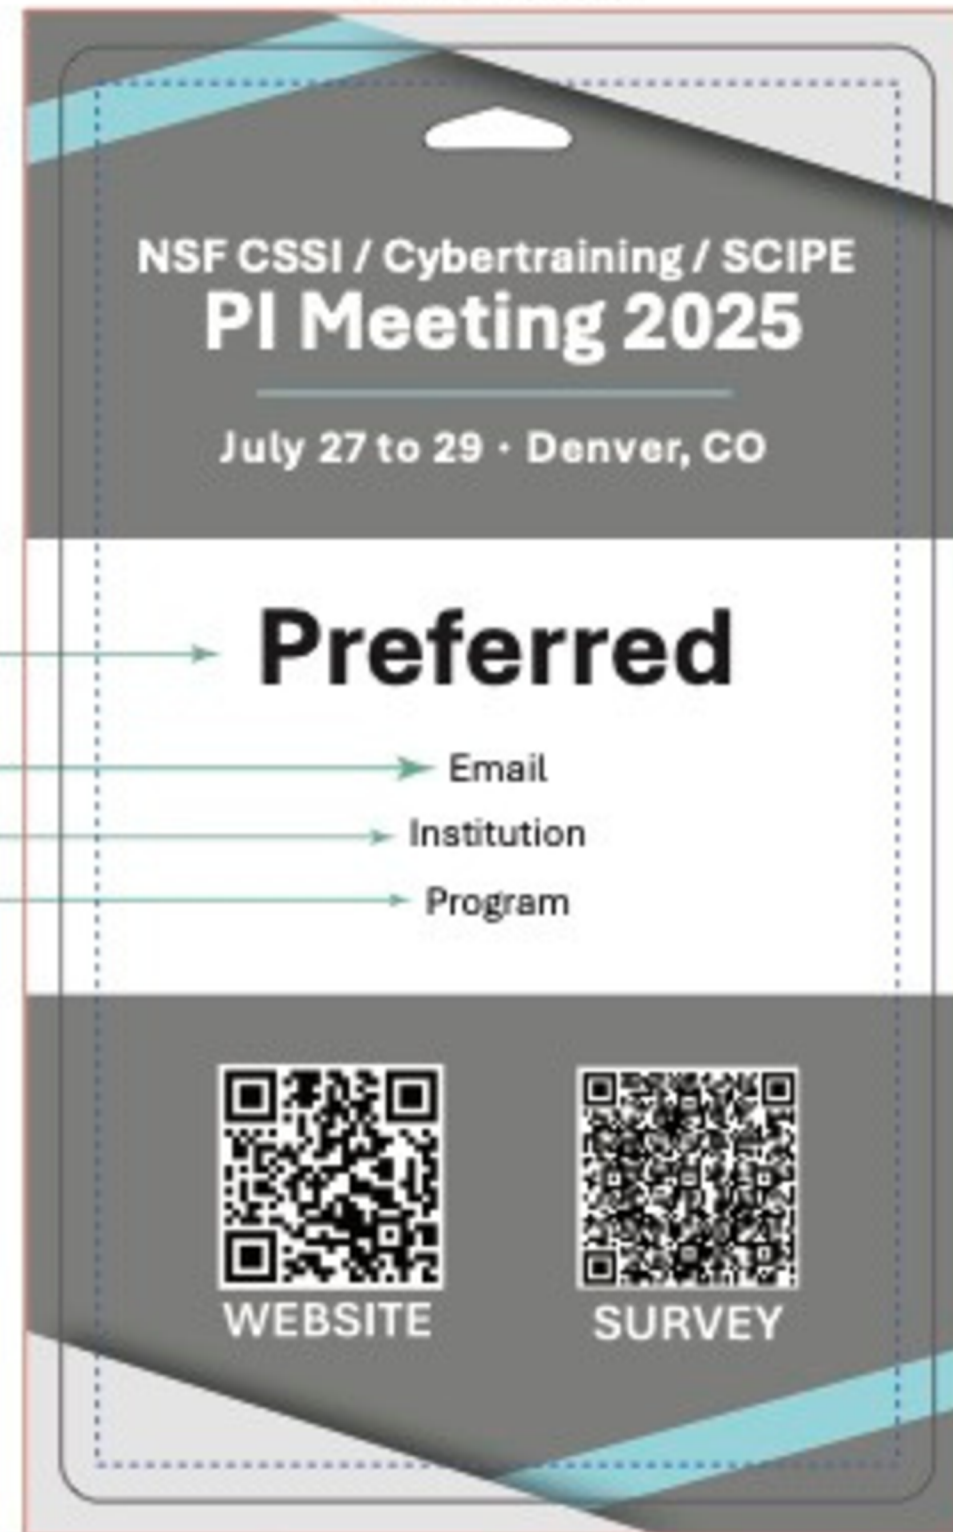

Please share references and data with your breakout facilitators.

# Housekeeping

# Badges

# FigShare DOIs

If you have **not** done so, please submit your digital posters.

1. Upload posters to FigShare with appropriate meta data
2. Share the FigShare DOI with us using the Google Form

Detailed instructions are under the website's poster section.

Please check the most recent poster session spreadsheet on the website.

# Meeting Survey

The feedback from the 2024 meeting survey determined

- the location
- the venue
- the timing
- the schedule
- the content
- the registration fee
- the organizing committee members

**Please complete it** at the end of the meeting.

Thank You
